

DIRECTIONS

TRAM STATION LIEBIGSTRASSE

TO THE *EHRENFELDSTUDIOS

Approximately 75 meters or about 3 minutes by foot

(Address: Wissmannstrasse 38, 50823 Köln)

FOR THE JOURNEY THERE

From the middle platform, for line 5 towards Ossendorf / Butzweilerhof, we walk along the guide line at the exit to the left, opposite the direction of travel, up to the attention field.

From the middle platform, for line 5 towards Heumarkt, we go at the exit to the right with the direction of travel and follow the guide line to the attention field.

From here the path is the same.

We walk along the central guide line down the ramp, with a mezzanine level secured by a railing. On reaching the audible traffic light, we turn right. We cross Subbelratherstraße; the roadway shares lanes with a cycle path and tram tracks. The sidewalks are lowered at each side.

After crossing the road, turn right and align yourself along the curb for about 7 meters.

To our left are dark gray tiled columns, some with bicycles leaning against them. We turn left, passing between the columns of the corner building, along the wall of the corner building, turning into Wissmannstraße.

Along the facades on the left, past 4 garages, we reach, after about 25 meters, house number 38.

We stand in front of the open blue steel gate of the Ehrenfeldstudios. We pass through the gate to the left and go about 7 meters straight across the courtyard to the opposite entrance of the dance studio. There is a small step up.

We are in the entry area of the Ehrenfeldstudios and are greeted there by a member of the organizing team.

RETURN JOURNEY

For the return to the Liebigstraße stop, we leave the dance studio, down a small step, straight ahead about 7 meters across the courtyard through the gate and turn right. We

keep to the right along the facade of the house, past 4 garages, to the corner house on the right.

From the corner, we orient ourselves about 10 meters further along the facade. We now reach the outdoor area of a pizzeria with tables and chairs, so we shelter between the columns toward the curb and follow this to the attention field of the audible traffic light.

We cross the street with a lowered curb. Reaching the opposite side, we turn left and follow the central guiding line up the ramp. At the top, the ground indicator splits into two directions.

Line 5 towards Heumarkt is on our left side. Line 5 towards Ossendorf / Butzweilerhof is thus on our right side.

For the left track there is, about 10 meters away, a covered and sheltered shelter with a bench. For the right track there is another shelter about 27 meters away.

We reach one information mast each after 20 meters with audio announcement.

We wish you a good and safe arrival and departure.
